- Import support for Shearwater Desktop dives (swlogzp)

# Shearwater Cloud Desktop Release Notes

DocRev: A

Date: 2018-12-11

- Text size control in settings
- Removed support for legacy cloud infrastructure (S3)
- Various bug fixes

## Release Notes Shearwater Cloud Desktop Beta 1.0.1 2017-11-08

### Important:

Shearwater Desktop dives need to be re-imported for changes to be properly implemented.

### New Features/Improvements:

#### Dive List

- Maximum depth will now display correctly

#### Dive Values

- OC dives imported into Cloud Desktop will now display correctly
- T1 and T2 Pressures will now display the correct values
- Gas Time will now display the correct value
- SAC will now display the correct value
- Surface Interval will now display the correct value
- CNS Start and CNS End will now display the correct values
- Gas switches show current values
- Time axis on dive profile graph displays time in minutes not seconds

#### Sync

- Fixed issue where after syncing, dives are being duplicated when the same dive is present in Cloud Mobile and Cloud Desktop

#### General Issues

- Minor performance improvement - Users computer will not sound like it's travelling in warp speed when running the program
- Mac install icon displays the proper Shearwater Cloud icon
